

Product Information: CasingIDTOOL™ (Cementing Assurance Services)

The CasingIDTOOL is the most efficient method to caliper the ID of your casing to determine the volume for displacement purposes and improving the efficiency of achieving plug bump.

Features/Benefits:

- Quickly, easily and accurately measure the ID of casing/liner
- Improve displacement volume accuracy and plug bump efficiency
- Supplied with Calibration Setting Ring for field checking
- 3 point self-centering head
- Each tool usually covers an ID range of 25mm/1.0 inch
- Simple 2 button operation and trigger
- IP65 electronics
- Manufactured to DIN 863, part 4
- Available to suit most casing/liner sizes up to 20"
- Available as Sales or Rental tool
- Shipped in protective case
